Environmental Policy

(ABN 41 068 031 407)

RBD Electrical believes it has an important duty to ensure good environmental performance in all its business operations and to provide the necessary organisation, commitment and training to fulfil this obligation. Senior management firmly believes in, and is committed to monitoring and improving environmental performance, pollution prevention and environmental protection.

We are committed to ensuring we comply with all relevant Local, State and Federal environmental legislative requirements and standards. This commitment means that we will:

- Pursue continuous improvement in environmental performance, where reasonably practicable, by setting measurable objectives and targets, especially in addressing the areas of resource use, by reducing inputs, such as electricity and water, and outputs, such as non-recyclable waste and greenhouse gas emissions;
- Consider the environmental impact of our operations and take appropriate steps to minimise or prevent environmental pollution from all sources;
- Conduct our operations in a manner that is designed to minimise the impact on the environment and the people who live and work in that environment;
- Provide sufficient training, resources, support and assistance to aid workers in fulfilling their environmental responsibilities.
- Encourage input from employees, contractors, suppliers and stakeholders on ways of improving our environmental performance.

Application of this policy

We seek the co-operation of all workers, contractors, clients and other persons relevant to RBD. We encourage suggestions for realising our environmental objectives.

This policy is subject to annual revision and applies to all RBD business operations and functions.
